Business Enterprise Upward Mobility Training

BSVI is committed to ensuring that all BE licensed Operators have access to necessary upward-mobility training opportunities. Below is guidance on how upward mobility training will be provided on an annual basis.

Future Upward Mobility Training Opportunities

BSVI's goal is to provide at least 4 upward mobility trainings annually (October 1 – September 30).

The Annual Operator Statewide training will represent 2 upward mobility training credits. Operators will receive 1 upward mobility certificate for each day of attendance.

Upward mobility trainings provided or sponsored by BSVI will be in line with the federal standard for Upward Mobility training, which is defined as: training to enable a 'BE Operator' to achieve increased skill levels necessary for transfer and promotion to more complex facilities.

All communication regarding future upward mobility training opportunities will clearly detail if an upward mobility certificate will be issued at the completion of the training.

Credit for upward mobility trainings that are NOT provided or sponsored by BSVI will be granted if the training is pre-approved by the BE Training Manager as being eligible and upon submitting proof of attendance such as conference agenda, registration, and receipt.

ServSafe, CPR, and First Aid certifications and renewals of same are not eligible for upward mobility credit.

Other Trainings Opportunities

BSVI will also continue to support the overall continued education and training needs for all BE licensed Operators, regardless of an operator's goal to promote to a more complex facility.

To provide this support, the BE Training Manager will routinely disseminate notices of training opportunities designed to maintain vendor skill levels and improve current business operations.

All communication regarding other training opportunities, which are not considered upward mobility, will be clearly stated in the individual training announcement.
